

THE LIST, 2026-10-06 close

893 names (S&P 500 + S&P 400). P = probability that the next 42 / 63 sessions trace a top-quartile smooth climb against the whole universe (Sharpe, max drawdown, straightness, up-day share), read off a monotone out-of-sample calibration (2024 onward, today's market regime; every step of the curve rests on at least 500 historical cases). Baseline 25%. Score = multi-factor composite (0-1). sigs = confirmed three-condition signatures firing; near = confirmed signatures one condition away from firing. Below the signature region, names are ordered by Score; in low beta the composite carried no out-of-sample edge, so those probabilities are flat by evidence, not by omission.

Tiers (P 42d):

Tier 1 ≥ 45%

Tier 2 40–45%

Tier 3 35–40%

Tier 4 30–35%

Tier 5 25–30%

Tier 6 below baseline

 sigs = confirmed three-condition signatures firing.
